The Inside Story

The Miller Group Delivers **5-Star Services** To Open Client's New Offices

www.themillergroup.com

Are you thinking of renovating or expanding your office space? Moving to a new location? Building a new additional location? The Miller Group will take care of your new IT environment.

Eliminate The Stress That Comes With Designing Your New Office's IT Systems

When you're launching a new business, dealing with IT can be a nightmare.

The many parts involved that have to be carefully selected, sourced, purchased, installed, configured, and launched are a lot to handle. One wrong move and your team won't be able to get to work on time in the new workspace.

Let our experts help by dealing with the technology-related complexity so you can immediately get to work on day one.

This is precisely why this client chose to work with us...

This Client Needed The IT Set Up At Their New Office

This education institution asked The Miller Group to help them prepare a new location, which they needed for additional administrative office space.

In assessing their needs, timeline and budget, we recommended the following key components for the new space's infrastructure:

- SonicWall firewall
- Unifi network switch

- Unifi APs
- UPS
- Network cabinet

Our team prepped the hardware and installed it onsite. We set up a site-to-site VPN connection to link this new office with the existing infrastructure. Once deployed, we then tested the installation and verified that all was working as expected.

Thanks to our careful planning and execution of the project, this client rated our services 5/5 stars.

Launch Your Business' IT Foundation—Error-Free

We follow a carefully-developed proactive IT strategy to help businesses hit the ground running at their newest locations.

We establish a comprehensive view of your IT solutions, and then carefully plan the build and launch of your environment to minimize downtime, mitigate the chance of data loss and configuration errors, and ensure your staff can get to work on the first day in the new location.

The bottom line is that you won't have to even think about your IT—we'll take care of it for you.

What We Will Do For You

Meeting Coordination With Key Collaborators

- Business Owner
- General Contractor
- Electrician
- Cabling Company
- Internet Provider
- Phone System Provider
- Security Systems/Cameras

Manage Technology Priorities

- Server Room Specifications
